

## 2018-19 Revisions to SP&P Manual

The school district's Exceptional Student Education Policies and Procedures (SP&P) document is intended to provide district and school personnel, parents of exceptional students, and other interested persons information regarding the implementation of the State's and school district's policies regarding ESE programs. The school district's SP&P document is developed/revised and submitted at various times in accordance with timelines required by the Florida Department of Education and is adopted by the school district's School Board as official policy.

The recent revisions to the 2019 SP&P document consisted of an annual review and update of restraint and seclusion data for the 17-18 school year. The updated data is located in:

Section A.6: District Plan Related to Reducing the Use of Restraint pages 6-10

Section A.7: District Plan Related to Reducing the Use of Seclusion pages 10-13

In addition, another annual review and data update was made to the district's plan to increase the participation of underrepresented students in the program for students who are gifted. The updated annual data is located in Appendix C pages 118-120.
