EXPLANATION OF THE ROLL-BACK MILLAGE RATE

Rolled-Back Rate: -- The millage rate for the new year which would produce the same level of ad valorem tax revenue as was levied in the prior year, after adjusting the new year's taxable property value by backing out "net new construction" and certain deletions.

In other words, the Rolled-Back Rate is the new millage rate that it would take to produce the same amount of property tax revenue using the new-year property tax roll, as was produced the year before by the prior-year actual millage rate and the prior-year tax roll.

For example: Assume that a residence is valued at \$125K less the homestead exemption of \$25K. So its taxable value in 2018 was \$100K. Assuming that the house combined property tax rate was \$20 per \$1,000 in valuation, that property owner paid \$2,000 in taxes in 2017.

Using the same example, if the home value was increased by 10K with the homestead exemption, what tax rate would the homeowner need in order to pay the same \$2,000 in taxes in 2018? That is what is considered the rollback rate. So the calculation would be \$135K less the 25K leaving 110K at the current rate would generate \$2,200 in taxes. To generate the \$2,000 in taxes the rate would need to roll back to the value from \$20 per 1000 to \$18 per 1000.
