Describe:

Follow-Up Activities: During weekly professional development sessions, Professional Learning Communities will model a Kagan Strategy that has been used in the classroom for other teachers and staff members. The staff will examine student work products to determine the effectiveness of the Kagan Strategy with meeting the lesson objectives.

Impact on Student Achievement The overall classroom environment will be improved through the use of Kagan Strategies. Student achievement will increase in reading, math and science as a result of reduced discipline problems and improved student collaboration. Students will also learn important skills including: • Critical Thinking • Student Leadership Development • Positive Interdependence • Individual Accountability • Equal Participation • Simultaneous Interaction Teachers will be able to incorporate engagement routines into the daily student lesson activities.
