

We, at Learning Wheels, agree to hold two workshops for Middleburg Elementary in Clay County, Florida. These workshops will be held on September 14th and October 12th, 2011 and the subject is math. Both workshops will be tailored to meet specific needs as requested, with the 3rd and 4th grade session focused on fractions and the 5th and 6th grade session targeting geometry and measurement. These are interactive, hands-on workshops full of instructional ideas to help insure student mastery of required skills.

The total price for each workshop will vary depending on the number of participants, but will include a minimum of 40 participants at each session. The total price will be \$110 per participant. This price includes all travel expenses, shipping, handouts, materials and consultant fees.

Each attending participant will receive a material bag with educational games valued at \$75 and a handout with games and activities that can be immediately implemented in the classroom. If you have any questions, please don't hesitate to call us. We want your workshops to be wonderful.

Thank you very much for choosing Learning Wheels!
