Due to the rising operational costs it is necessary to increase meal prices for the first time in six school years. Higher cost of food, supplies and fuel are a factor in this proposed increase. However, in the past 3 years careful attention has been given to improving Clay County's menu items. The mandatory Wellness Policy (Federal Public Law 108.265 Section 204) requirements in combination with higher food quality have attributed to increasing food costs for our department.

In addition, Food and Nutrition Services is now responsible for more expenditures than in previous years (i.e., electricity in kitchens, dumpster fees, maintenance repairs, installation of large kitchen equipment.)
