

Update to the Student Progression Plan 2010-2011

Secondary Education Section:

A student who does not successfully complete one or more of the core classes (Mathematics, Science, Social Studies, Language Arts) from the previous school year, and who takes a virtual course for grade recovery should have the course(s) completed prior to the beginning of the next school year. If enrollment takes place after the first 10 days of school, the student will be required to:

- Complete all assignments given prior to enrollment either through Compass (if available) or the instructor in a time period set by the school;
- Complete all assessments either through Compass (if available) or from the instructor in a time period set by the school;
- Satisfy the standards or competencies required up to the point of enrollment.

Clay County is very concerned about the loss of instruction time and maintains the philosophy that due to students being required to meet state standards, all students will be exposed to the same instruction and assessments.
