

AN EXPLANATION OF ROLLED-BACK MILLAGE RATE

“Rolled-Back Rate: -- The millage rate for the new year which would produce the same level of ad valorem tax revenue as was levied in the prior year, after adjusting the new year’s taxable property value by backing out “net new construction” and certain deletions.

In other words, the Rolled-Back Rate is the new millage rate that it would take to produce the same amount of property tax revenue using the new-year property tax roll, as was produced the year before by the prior-year actual millage rate and the prior-year tax roll.

The theory behind the “Rolled-Back Rate” is to maintain a constant revenue stream from local property tax sources. Presumably, as the tax roll increases in value, the millage rate would drop proportionately. Unfortunately, this theory does not provide for funding student enrollment growth nor does it allow for basic inflationary cost increases. A third limitation is the historical trend toward rapidly declining state revenues expressed as a percentage of the School Board’s operating and capital outlay budgets.
