Subject: Shingles

Good Morning Nancy,

I am asking to be released from the asphalt shingle pricing agreement from 2008. Due to the demand and production pressure that shingle manufacturers are faced with they have had to raise their pricing. Increases in the asphalt market has not caused this increase in price. With that said, effective June 15th. 2009 your new price on Tamko 25 year 3 tab shingles will be \$23.99 per bundle or \$71.97 per square. This is a \$1.00 increase per bundle and \$660.00 increase per truckload of 220 squares.

The pricing increase from production demands are due to the extreme amounts of roof damage that occurred 2008 from the hurricane that hit Galveston & Houston Texas. Also in Feb. 2009 central Georgia was hammered with hail storms that damaged 300,000 roofs.

Keystone Building Center would still like to provide Clay County School Board with Roofing products based on the new quoted price.

Sincerely,

Brian Gassett
Vice President
Keystone Building Center Inc.
