Attachment 1	5-Year District Facilities Work Program	1-24
---------------------	--	-------------

INTRODUCTION

The Educational Facilities Plan (EFP) is prepared annually, prior to the adoption of the District's annual budget, pursuant to the requirements of Section 1013.35, Florida Statutes. Prior to October 1st each year, the plan is submitted to the Florida Department of Education (FDOE) for review and to all affected local governments to be reviewed for consistency with its comprehensive plan.

The plan provides the proposed commitments and planned expenditures of the School District to address the educational facilities needs of its students and to adequately provide for the maintenance of the educational and ancillary facilities, including safe access ways from neighborhoods to schools. The plan must include the following:

- (a) Projected student populations;
- (b) An inventory of existing and proposed school facilities;
- (c) Projections of facility space needs;
- (d) Information on leased, loaned and donated space and relocatables;
- (e) The general location of existing and proposed new schools;
- (f) Options to reduce the need for additional permanent new stations;
- (g) The criteria and methodology for determining the impact of proposed development on public school capacity; and
- (h) A financially feasible Work Program for a 5-year period.

Upon giving proper notice to the public and local governments and an opportunity for public comment, the District may amend the plan to revise the priority of projects, to add or delete projects, to reflect the impact of change orders, or to reflect the approval of new revenue sources which may become available.

The Educational Facilities Plan has been divided into the following sections:

Section 1: Planning. This section addresses the various planning concepts, methodologies, and processes that the School District must implement in order to prepare a financially feasible plan. Topics discussed in this section include: enrollment forecasting, existing school inventory, future schools, construction costs, and school concurrency.

Section 2: Maintenance and Transportation. This section addresses maintenance projects and bus transportation plans for the District.

Section 3: Capital Outlay Plan. This section provides the sources of revenue used to finance our educational projects and itemizes our planned expenditures to arrive at a balanced plan.

Section 4: Information Services Technology Facilities Plan. This section is used to prioritize projects and match revenue sources in support of Technology Projects.

Section 5: *Financially Feasible Work Program*. This section provides the 5-year work program which includes a 10-year and 20-year long range plan. This document is also submitted electronically to the FDOE using its prescribed format.

SECTION 1. PLANNING

1.1 Population and Housing Demographics

Recently, the near collapse of the housing industry and the economy in recession has population migration and growth at the lowest levels seen by the School District staff in recent memory. The Clay County School District student population is projected to have a negative growth rate for 2009/10 school year. Table 1.1 and Table 1.1.1 reflect that trend with local municipalities having little change in their population numbers.

Table 1.1 2008 Population Estimates

1.2 Student Enrollment Projections

The FDOE annually prepares Capital Outlay Full-Time Equivalent (COFTE) Public School Enrollment projections for each school district for a 10 year period. The COFTE methodology uses a cohort-survival technique that presumes that the last five years is the best predictor of the next 10 years. The projections are district-wide and are broken down by grade. FDOE projections are for public school enrollment only and do not include private school, charter school or home school enrollment. Table 1.2 shows actual and projected COFTE for pre-kindergarten (Pre-K) through grade twelve (12) enrollment through 2013-14. The District enrollment for the end of 2008/09 school year was 35,394 (SDCC monthly membership report June 2009). The Florida Department of Education projected COFTE enrollment is forecasted to be 35,454 students for the SY 2010 and 36,260 students by SY 2013-14, an increase of roughly 866 students from the 2010 projection.

1.3 Classroom Requirements

The District continues to actively plan capital projects to meet the Class Size Reduction (CSR) requirements. The CSR requires one teacher for 18 students in grades PreK-3, one teacher for 22 students in grades 4-8, and one teacher for 25 students in grades 9-12. Due to the downturn in the economy coupled with recent legislative action CSR compliance for 2009-10 is determined for each of the three grade groupings by the average at the school level. Table 1.4 shows the number of surplus classrooms District-wide available to meet the projected COFTE student enrollment based on the CSR mandate.

Table 1.3 Classroom Requirements

Total	60	2	-18	44					110

1.4 Existing and New School Facilities

The District currently has 39 schools that will be open for students in the 2009-10 School Year. An inventory of existing schools is shown in Table 1.4 and their general locations are shown on Map 1.1. The District does not utilize any leased or loaned facilities for classroom purposes.

In the next 5 year period, the District plans to complete construction of one new high school. By the 2029-30 school year a total of 21 schools are planned to be constructed. There are no new schools projected to be built in the next five years. The proposed new schools for the 5, 10 and 20 year periods are shown in their general locations in Table 1.4.1 and Map 1.2. General school locations of future school sites are based on the school siting policies in the interlocal agreement and comprehensive plans of the local governments.

Map 1.2 Proposed New Schools Map

1.5 Construction Costs

The construction costs provided by FDOE do not include the cost for land acquisition. According to the most recent School Impact Fee Study dated March 2008 with revisions dated February 2009, land values in Clay County are approximately \$50,000 per acre. The District's minimum school acreage standard and number of student stations for proposed school sites are shown in Table 1.5.

Table 1.5 School Construction Costs

School	Acreage	# of Student Stations*	Cost per Student Station**	Total Construction Cost***
Elementary	30	862	\$19,140	\$16,498,680
Junior High	40	1,117	\$20,669	\$23,087,273
Senior High	60	1,684	\$26,848	\$45,212,032

* Number of Student Stations is based on the CCSB Educational Facilities Requirements for new schools by type.

** Cost per Student Station is based on DOE cost forecast for January 2009.

*** Total Cost is product of the cost per student station and number of student stations for each school type.

Source: Student Station Cost Factors, DOE, July 2008

1.6 Increased Student Stations District-Wide

The number of student stations for the School District will increase as a result of new schools. Table 1.6 shows the additional student stations and the approximate timeline for their completion.

Table 1.6 New Student Stations

School	Project Description	Opening School Year	Net New Student Stations
County-wide	Relocatables	2009 thru 2014	0
POE	New School	2009	929
"QQQ"	New School	2010	1684
MBE	New Wing	2010	36

1.6.1. Permanent Student Station Reduction

In order to reduce the need for additional permanent student stations, the District will consider options such as redistricting, reassignment, and expanded capacity utilization (i.e. year-round school, split scheduling, and block scheduling). Currently, the District is using co-teaching in several schools to accommodate the need.

1.7 School Capacity

Florida Statutes requires that each School District monitor and manage their respective school capacities to ensure that the established Level of Service is not exceeded in any one school.

The available student capacities and Level of Service (LOS) for each educational facility along with the projected student populations based on the Department of Education COFTE are shown in Table 1.7. The table gives a visual comparison of the total number of proposed students with the total number of proposed student stations extrapolated through twenty years showing projected new school start-ups.

SECTION 2. MAINTENANCE AND TRANSPORTATION

2.1 Maintenance and Repairs

Maintenance and repairs must be done to ensure that buildings function efficiently and remain environmentally safe and secure. Special maintenance projects such as renovations, HVAC systems, roofs, and flooring are undertaken throughout the year. A summary of maintenance projects for the 5-year period is shown in the Capital Outlay Expenditures in Section 3 of this document.

2.1.1 Bus Transportation and Equipment

Each year buses are purchased and replaced due to their age and additional school programs. The bus costs are projected to increase approximately 6.5% per year. Passenger bus and radio (equipment) costs are shown in Tables 2.1 The Bus inventory management plan for both ESE and Regular buses is outlined in tables 2.2 and 2.3.

Table 2.1 Capital Outlay Regular Education, ESE Buses and Radios

Fiscal Year	Purpose	Qty	Type Bus	Projected Cost (Ea)	Budget Impact

SECTION 3. CAPITAL OUTLAY PLAN

3.1 Revenue Sources

Capital Projects Funds are used to account for financial resources that the district uses for acquisition or construction of major capital facilities and improvements to existing facilities. Land acquisition, equipment purchases, buses, maintenance and capital debt service are also accomplished with these funds. There are several revenue sources that are designated to fund all of the capital projects for the 5-year and 10-year periods:

- (a) **Public Education Capital Outlay (PECO)** funds are derived from a Gross Receipts Tax on utilities, and are reallocated to each school district by the State Legislature in the form of Public Education Capital Outlay Funding. Funds are allocated from a lump sum appropriation to the 67 school districts based upon a formula in Section 1013.64(1)(a), F.S. Funded projects must be recommended in the Educational Plant Survey. Cost ceilings on new schools apply to these funds.
- (b) **Classrooms for Kids** funds are for classrooms required to reduce class sizes as a result of the passage of Amendment 9 to the Florida Constitution.
- (c) **1.5-Mill Levy** is determined by using the certified tax roll. Section 1011.71(2), F.S., authorizes districts to levy up to two mills for capital outlay purposes without an election. These funds cannot be used to pay salaries or other operating costs. They may only be used to buy school buses, buy land or to renovate or build schools, and to pay debt service (i.e. Certificates of Participation).
- (d) **BCC Local Option Sales Tax** funds are received from the County derived from the voter approved one-cent sales tax. The School District receives 10% and it is utilized on technology.
- (e) **Educational Facility Impact Fees** are assessed on a countywide basis to cover the costs of public school facilities necessitated by growth and development. School impact fees are charges paid by new residential development i.e. houses, apartments, mobile home and other residential construction that potentially generates public school enrollment. School impact fees are not imposed to cover the full cost of new school capacity but rather to cover an amount equal to the difference between the total cost and the other available sources of revenue appropriated for capital facilities. Impact fees can only be charged for that portion of the cost of public facilities that is attributable to the new development and cannot be used to pay the cost of reducing existing deficiencies. The current school impact fees in Clay County are:
 - Single-Family - \$7,034 per dwelling unit
 - Multi-Family - \$3,236 per dwelling unit
 - Mobile Home - \$5,979 per dwelling unit
- (f) **Certificates of Participation (COPS)** amounts are determined by district administration and reviewed and approved by the Board. Proceeds from the issuance of these certificates can be used to acquire land and finance capital projects.

SECTION 4. TECHNOLOGY FACILITIES PLAN

This section of the Educational Facilities Plan is used to prioritize projects and match revenue sources in support of Technology projects. The Technology installed in the school district has become an integral part of the Educational Facilities. Technology is required to capture attendance, assess student progress, test student achievement, administer the business functions of the school, provide for research, and support the curriculum presentation. Support for this service requires regular maintenance to replace aging equipment and expansion of new technology in support of new and increased usage of the district's infrastructure.

The predominant funding source for technology is from the BCC Sales Tax that expires in 2019. This funding source provides approximately \$1.6 million and is restricted to support technology purchases with a life expectancy of five years or longer. No portion of this revenue may be used to pay for operational costs or leasing costs. Leasing programs can be used to install as much as three times the value of the hardware and allow for the replacement at planned intervals.

The number of installed computers is expanding at a rate of approximately 2200 PCs annually. Presently there are 15,215 computers on the asset database. The annual cost of licenses and required software support is growing at a rate of \$107,800 annually. This recurring cost does not include the costs associated with staff and parts required to repair older computers.

The critical factors that need to be addressed are:

- Age of installed Computer Lab PCs
- Decreasing Sales Tax Revenue
- Increasing number of supported PCs
- Increasing use of computers in instructional programs
- Department of Education assumptions that SDCC has capacity to do online testing
- Age of installed Routers and Servers
- Condition of the District Data Center

4.1 Planning

The District Technology Plan is reviewed by the School Board annually and is presented to the Florida Department of Education, the U.S. Department of Education in support of EETT grants, and to the Universal Services Administration Corporation (USAC) as part of the ERate funding programs. In this document the District has identified the requirements and priorities to be observed in the technology provided to the District.

Priority 1: District Infrastructure

District installed equipment and communications must be operational or the entire District may be impacted. This includes all data center hardware and software installed at the data center as well as communication services. Additionally, any telecommunications services provided anywhere in the District and software required to protect the security and privacy of the District's data and network services.

District Infrastructure is used to group all hardware, software, and facilities required to operate the District's computer and telecommunication systems. The failure of services supported by this group would have a significant service and/or financial impact on the District.

If this equipment fails the entire School District could be affected.

There are two areas that should be addressed.

1. Reliability of the District Data Center

- a. The building is very old and therefore was not designed to meet today’s requirements. The insulation and physical security of the building needs improvement. Air Conditioning has been adapted to the building and is adequate but expensive to operate.
- b. Division of Support Services has attempted to address the problem by building a data center as part of efforts to provide office and administrative space for several years. This effort has not succeeded primarily due to a lack of funding. Reduction in State provided funds and priority given to other needful projects has left this need unresolved.

2. Aging of the Switches District Wide

- a. There are 301 Switches that are not serviceable. If they fail for any reason we are not able to get parts or support from the manufacturer due to the age of the equipment. If a switch fails then a portion of a school or an entire school could be without network services.
- b. Switches are critical and should be replaced proactively instead of reactively.

An analysis of the current status of the District’s infrastructure follows arranged by logical group.

Table 4.1 District Switch Aging

Series	Total	Status	Last Day of Support
Current Switches Total	140	Fully Supported	
Cisco Catalyst 2950 Series Switches	1	No Software Maintenance	12/30/2011
	2	No longer Sold	10/20/2013
	3	No longer Sold	10/20/2013
Cisco Catalyst 3560 Series Switches	9

	200	No longer Supported	5/30/2005
	1	No longer Supported	1/31/2004
	18	No longer Supported	5/30/2005
Sub-Total	302		
TOTAL	485		
Percent not Repairable	62%		
Replacement Cost @ \$4000 each	\$1,208,000		

Table 4.1.2 School Phone System Projections

School Phone System Projections						
7-10 Year Rotation	2009-10	2010-11	2011-12	2012-13	2013-14	5 Year Total
Elementary	\$0	\$0	\$25,000	\$25,000	\$0	\$50,000
Junior High	\$75,000	\$0	\$0	\$30,000	\$0	\$105,000
High Schools	\$0	\$75,000	\$75,000	\$0	\$75,000	\$225,000
TOTAL	\$75,000	\$75,000	\$100,000	\$55,000	\$75,000	\$380,000

Priority 2: School Infrastructure

School installed equipment that serves the entire school. This includes the routers, servers, switches, access points, and communication services. Additionally any software required in maintaining Children’s Internet Protection Act compliance.

School Infrastructure refers to all hardware, software, and facilities required to operate a school. Failure of equipment or services in this category could affect a single classroom, a wing at a school, or possibly the entire school.

For planning purposes this will include:

1. School installed Servers
2. School installed UPS systems

Table 4.1.3 School Located Server Projections

School Servers						
5 - 7 Year Rotation	2009-10	2010-11	2011-12	2012-13	2013-14	5 Year Total
Replacement Servers	\$268,800	\$268,800	\$268,800	\$268,800	\$268,800	\$1,344,000
TOTAL	\$268,800	\$268,800	\$268,800	\$268,800	\$268,800	\$1,344,000

Priority 3: Computer Labs and Media Centers

Computer Labs provide for instruction and assessment services. Computer labs will be defined as dedicated rooms with multiple desktop PCs installed, sections of a Media center with multiple computers, laptop carts loaded with computers and moved to different rooms.

Computer Labs and Media Centers support intensive applications and must be capable of running required software. The District Technology Plan indicates that computer labs should have current PCs installed. Current is defined as a newer PC that is replaced every 3 years.

Factors affecting the demand for computer labs:

1. The Florida Department of Education continues to push for computer based testing but has not provided the funds to create enough student stations to support the volume required during the testing period. This results in the displacement of instructional time since the lab must be used for testing.
2. The Florida Department of Education is moving expenses to the School Districts and not providing funds. (Internet Connections)
3. The Florida Department of Education formulas for allocation of Computer Labs does not support enough Fixed Computer Labs. Fixed Computer Labs are more efficient and cost effective than Laptop Carts.
4. The BCC Sales Tax proceeds may not be sufficient to maintain the technology defined in the District Technology Plan over the long term. Restrictions do not allow for leasing equipment.
5. Oakleaf Town Center is located in Duval County and could draw shoppers away from Clay County. Result is downward pressure on Sales Tax revenue.
6. The Instructional Division has been forced to change the software used for Compass and Plato labs to Odyssey in all the Secondary schools. The vendors are changing their architecture from client server to Web based increasing the demand for more and faster internet connections.
7. It has become necessary to have applications hosted off site due to the need for application specific support. Personal computers must have faster processors and more memory than present machines to support the requirements of applications.

Computer Labs do not necessarily need to have current PCs. The applications used in the lab will determine the requirements of the PC. We have identified seven types of labs. This identification is used as a general definition and is not intended to be precise. Each type of lab is identified in the table below with a description of the qualities that make it unique.

Table 4.1.4 Computer Lab Programs

PROGRAM	USE	REQUIRES	FUNDING	ANNUAL AMOUNT
Adult Continuing Education	High School Completion, Remediation	New Century SW, MS Office	District Provided	Sales Tax
Career and Technical Education	Business Labs, Drafting Labs, Networking programs.	Diversified and requires most current software and hardware to run the program.	District Provided	Sales Tax
Open Laptop Labs	General use, student research, Online courses, Remediation. Online Testing	MS Office	District Provided	Sales Tax
Odyssey (Compass/Plato)	Intensive study, credit recovery, Remediation	Services is a hosted application. MS Office	District Provided	Sales Tax
Open Computer Labs	General use for research and Online courses. Online Testing.	MS Office	District Provided	Sales Tax
Resource Labs	K-6 Tech Class, 7-12 Reading and Basic Ed	MS Office	District Provided	Sales Tax
Title I Labs	Only used at Elementary Title I schools.	Runs Successmaker software.	Title I Only	\$50,000 Only Title I funds

The following table shows the aging of labs by program.

Table 4.1.5 Computer Lab Aging by Program

SUMMARY OF COMPUTER LAB AGING BY PROGRAM			
Program	Older than 5 years	Total PCs	Percentage not Repairable
ADULT CONTINUING EDUCATION PROGRAMS	134	480	28%
CAREER AND TECHNICAL EDUCATION PROGRAMS	173	1,094	16%
OPEN LAPTOP LABS	111	263	42%
ODYSSEY (COMPASS/PLATO) LABS	263	519	51%
OPEN COMPUTER LABS	349	1,397	25%
RESOURCE LABS	196	809	24%
TITLE I LABS	146	296	49%
TOTAL	1372	4858	28%

Priority 4: Individual Use Computers

Administrator and Teacher PCs, PCs in basic education classrooms and Printers.

The following tables provide the status of current installed technology.

There is no plan for the direct replacement of individual computers. Practice has been to replace as they fail or to upgrade with computers being moved out of Computer Labs. The District has been supporting the replacement based on the following strategy.

If the PC will not support the required software in use on the computer it will be replaced.

Table 4.1.6 Aging of Installed Computers by Aging Percentage – Secondary

SECONDARY SCHOOL INSTALLATIONS							
School ID	PCs Purchased in the Year					Grand Total	% Older than 5 Years
	Older than 2005 - No Parts	2006 - Out of Warranty	2007	2008	2009

	62%						
2006 and Older	9722						
Replacement Costs: \$	8,749,800						

By summer of 2010: 64% of the computers will be older than 5 years.

4.2 Capital Outlay Plan

Funding for District Technology Plans is provided primarily from BCC Sales Tax Receipts and is used for Technology Projects having a life expectancy of 5 years or more. Additionally, these funds are used to fund remodeling projects required to support the network. This would include wiring and wireless installations and preparing rooms for additional electronic equipment.

Revenue Sources

1. **BCC Local Option Sales Tax** funds are received from the County derived from the voter approved sales tax.
2. **ERate Rebate** funds are received from the Universal Service Administration Corporation based on the percentage of students eligible for Free and Reduced Lunches. The rebate applies to the cost of telecommunications cost paid by the District that meet definitions defined by law. Presently the District is receiving a 53% discount. By Law, the District must fully fund the expense of the services, through other sources, for which a Rebate is received. The law also requires that the District have a Financially Feasible District Technology Plan.
3. **.250 Additional Discretionary Levy** will be available in 2009-10 and 2010-11 if the School Board votes to levy the tax. After 2010-11 the funding would be subject to a vote. Funding is used for General Fund expenditures and would allow for funding Technology projects.

Table 4.2 Revenue Sources

FUND SOURCE	2009-10	2010-11	2011-12	2012-13	2013-14	5-YEAR TOTAL

SECTION 5. 5-YEAR DISTRICT FACILITIES WORK PROGRAM

5.1 5-Year District Facilities Work Plan

A component of the Educational Facilities Plan is the 5-Year District Facilities Work Program. The format is prescribed by DOE and includes:

- A schedule of major repair and renovation projects necessary to maintain the educational facilities and ancillary facilities of the district;
- A schedule of capital outlay projects necessary to ensure the availability of satisfactory student stations for the projected student enrollment;
- The projected cost for each project identified in the work program;
- Revenues anticipated to be available to fund the proposed projects;
- A schedule showing how each project is to be funded; and
- A schedule of options for the generation of additional revenues to fund the work program.

The schedule of capital outlay projects must consider:

- The location, capacities and planned utilization rates of existing facilities;
- The location, capacities and planned use of proposed facilities with emphasis on new facilities to be constructed within the first three years of the work plan;
- Plans for the use and location of relocatable, leased and charter school facilities;
- Alternatives to be used to reduce the need for new permanent student stations;
- The effect of the work plan on class size and utilization rate by grade level;
- The number and percentage of students planned to be educated in relocatables; and
- Plans for the closure of any schools.

Attachment 1 5-Year District Facilities Work Plan

INTRODUCTION

The 5-Year District Facilities Work Program is a very important document. The Department of Education, Legislature, Governor's Office, Division of Community Planning (growth management), local governments, and others use the work program information for various needs including funding, planning, and as the authoritative source for school facilities related information.

The district's facilities work program must be a complete, balanced capital outlay plan that is financially feasible. The first year of the work program is the districts capital outlay budget. To determine if the work program is balanced and financially feasible, the "Net Available Revenue" minus the "Funded Projects Costs" should sum to zero for "Remaining Funds".

If the "Remaining Funds" balance is zero, then the plan is both balanced and financially feasible.
 If the "Remaining Funds" balance is negative, then the plan is neither balanced nor feasible.
 If the "Remaining Funds" balance is greater than zero, the plan may be feasible, but it is not balanced.

Summary of revenue/expenditures available for new construction and remodeling projects only.

	2009 - 2010	2010 - 2011	2011 - 2012	2012 - 2013	2013 - 2014	Five Year Total

CERTIFICATION

By submitting this electronic document, we certify that all information provided in this 5-year district facilities work program is accurate, all capital outlay resources are fully reported, and the expenditures planned represent a complete and balanced capital outlay plan for the district. The district Superintendent and Chief Financial Officer have approved the information contained in this 5-year district facilities work program, and they have approved this submission and certify to the Department of Education, Office of Educational Facilities, that the information contained herein is correct and accurate. We understand that any information contained in this 5-year district facilities work program is subject to audit by the Auditor General of the State of Florida.

Expenditures

Expenditure for Maintenance, Repair and Renovation from 1.50-Mills and PECO

Annually, prior to the adoption of the district school budget, each school board must prepare a tentative district facilities work program that includes a schedule of major repair and renovation projects necessary to maintain the educational and ancillary facilities of the district.

Revenue

1.50 Mill Revenue Source

Schedule of Estimated Capital Outlay Revenue from each currently approved source which is estimated to be available for expenditures on the projects included in the tentative district facilities work program. All amounts are NET after considering carryover balances, interest earned, new COP's, 1011.14 and 1011.15 loans, etc. Districts cannot use 1.5-Mill funds for salaries except for those explicitly associated with maintenance/repair projects. (1011.71 (5), F.S.)

Item	Fund	2009 - 2010 Actual Value	2010 - 2011 Projected	2011 - 2012 Projected	2012 - 2013 Projected	2013 - 2014 Projected	Total
(1) Non-exempt property assessed valuation		\$10,520,248,840	\$11,151,463,770	\$11,820,551,597	\$12,529,784,692	\$13,281,571,774	\$59,303,620,673

The COFTE Projected Total (36,260) for 2013 - 2014 must match the Official Forecasted COFTE Total (36,260) for 2013 - 2014 before this section can be completed. In the event that the COFTE Projected Total does not match the Official forecasted COFTE, then the Balanced Projected COFTE Table should be used to balance COFTE.

Projected COFTE for 2013 - 2014	
Elementary (PK-3)	11,939
Middle (4-8)	13,781
High (9-12)	10,540
	36,260

Grade Level Type	Balanced Projected COFTE for 2013 - 2014
Elementary (PK-3)	0
Middle (4-8)	0
High (9-12)	0
	36,260

Relocatable Replacement

Number of relocatable classrooms clearly identified and scheduled for replacement in the school board adopted financially feasible 5-year district work program.

Location	2009 - 2010	2010 - 2011	2011 - 2012	2012 - 2013	2013 - 2014	Year 5 Total
Total Relocatable Replacements:	0	0	0	0	0	0

Charter Schools Tracking

Information regarding the use of charter schools.

Nothing reported for this section.

Special Purpose Classrooms Tracking

The number of classrooms that will be used for certain special purposes in the current year, by facility and type of classroom, that the district will, 1), not use for educational purposes, and 2), the co-teaching classrooms that are not open plan classrooms and will be used for educational purposes.

Infrastructure Tracking

Necessary offsite infrastructure requirements resulting from expansions or new schools. This section should include infrastructure information related to capacity project schedules and other project schedules (Section 4).

Not Specified

Proposed location of planned facilities, whether those locations are consistent with the comprehensive plans of all affected local governments, and recommendations for infrastructure and other improvements to land adjacent to existing facilities. Provisions of 1013.33(12), (13) and (14) and 1013.36 must be addressed for new facilities planned within the 1st three years of the plan (Section 5).

Not Specified

Consistent with Comp Plan? No

Net New Classrooms

The number of classrooms, by grade level and type of construction, that were added during the last fiscal year.

List the net new classrooms added in the 2008 - 2009 fiscal year.					List the net new classrooms to be added in the 2009 - 2010 fiscal year.			
"Classrooms" is defined as capacity carrying classrooms that are added to increase capacity to enable the district to meet the Class Size Amendment.					Totals for fiscal year 2009 - 2010 should match totals in Section 15A.

Failed Standard Relocatable Tracking

Relocatable units currently reported by school, from FISH, and the number of relocatable units identified as 'Failed Standards'.

Nothing reported for this section.

Planning

Class Size Reduction Planning

Plans approved by the school board that reduce the need for permanent student stations such as acceptable school capacity levels, redistricting, busing, year-round schools, charter schools, magnet schools, public-private partnerships, multitrack scheduling, grade level organization, block scheduling, or other alternatives.

The Clay County School District has considered redistricting, busing, year-round schools, charter schools, magnet schools, public-private partnerships, multitrack scheduling, grade level reorganization and block scheduling as alternatives to new classroom construction. None are supported as viable means to meet the growth and capacity issues of the district.

School Closure Planning

Plans for the closure of any school, including plans for disposition of the facility or usage of facility space, and anticipated revenues.

None

Long Range Planning

Ten-Year Maintenance

District projects and locations regarding the projected need for major renovation, repair, and maintenance projects within the district in years 6-10 beyond the projects plans detailed in the five years covered by the work plan.

Project	2013 - 2014 / 2018 - 2019 Projected Cost
Various Maintenance Projects	\$30,083,656
	\$30,083,656

Ten-Year Capacity

Schedule of capital outlay projects projected to ensure the availability of satisfactory student stations for the projected student enrollment in K-12 programs for the future 5 years beyond the 5-year district facilities work program.

Project	Location, Community, Quadrant or other general location	2013 - 2014 / 2018 - 2019 Projected Cost
ELEMENTARY "R"	GREEN COVE SPRINGS AREA	\$22,530,000
		\$22,530,000

Ten-Year Planned Utilization

Schedule of planned capital outlay projects identifying the standard grade groupings, capacities, and planned utilization rates of future educational facilities of the district for both permanent and relocatable facilities.

Grade Level Projections	FISH Student Stations	Actual 2008 - 2009 FISH Capacity	Actual 2008 - 2009 COFTE	Actual 2008 - 2009 Utilization	Actual 2009 - 2010 / 2018 - 2019 new Student Capacity to be added/removed	Projected 2018 - 2019 COFTE	Projected 2018 - 2019 Utilization
