Clay County School "X"

Mr. Jim Connell
Director Facility Planning & Construction
Clay County District Schools
925 W. Center Street
Green Cove Springs, FL 32043

via hand

**Re: Clay County School "X"
GMP Proposal**

Dear Mr. Connell,

Thank you for your trust in allowing us to participate in the pre-construction process for your new school "X". We appreciate and value your trust. We are excited about the opportunity to proceed ahead with construction leveraging off of the great teamwork developed thus far. We look forward to your signal to mobilize the site.

In follow-up to our pre-GMP submittal review meeting, please find enclosed our May 4, 2007 GMP Proposal for the Clay County School "X" Site. The following Key Factors are identified as primary items to consider while reviewing our proposal:

Cost Evaluation:

The GMP amount submitted herein is within 3 % of the original conceptual estimate and several percent lower than the design development estimate. This is due to the successful teamwork by the Owner, Architect and Construction Manager to date. Skanska looks forward to continuing this process and completing the project within budget. The site portion of the GMP is not included as the design is not complete and this will be forward around the first of May per our discussions.

This GMP for the site portion included herein for school "X" will be added to the Building GMP portion of school "X" for a total project cost.

Construction Schedule:

The GMP proposal relies upon key milestone dates identified within the schedule. Certain critical items including the procurement of property, permitting, notice to proceed, timely procurement and engineering activities are necessary to maintain the schedule and costs as proposed. Because this project is a tilt-up project, there will be

an intense submittal and coordination process in May and June of 2007 that will require keen attention by all team members.

Staffing:

Our project staff is currently preparing to mobilize the site in the timeframe necessary to affect the progress of construction per the schedule included with the GMP Proposal. We are anxiously looking forward to working with you and your team in conjunction with the architect to successfully complete the project and meet or exceed each of our goals.

Clarifications and Assumptions:

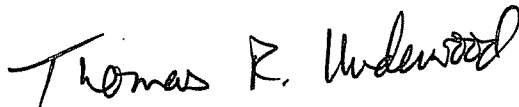

The proposal is based upon the drawings and specifications as identified within this package. We have included our Clarifications and Assumptions that further clarify the proposal.

GMP Amendment:

We understand that Clay County District Schools will issue an amendment to incorporate the GMP proposal into our contract. This document will be executed by Skanska upon receipt and returned immediately with bonds and insurance.

We look forward to hearing from you with regards to our GMP Proposal. Should you have any questions, please do not hesitate contacting me. We respectfully request your advisement as to the acceptance of our GMP Proposal on or before May 18, 2007.

Sincerely,
SKANSKA USA BUILDING INC.

Tom Underwood
Project Executive

Encl.: GMP Proposal, May 4, 2007

Clay County Elementary School X
Guaranteed Maximum Price (for site work to be added to Bldg GMP)

May 3, 2007

BID PACKAGE	DESCRIPTION	LOW SUB BID
---	General Requirements	\$150,000
02A	Earthwork	\$923,225
02B	Site Utilities	\$774,225

J	TOTAL - SITE GMP TO ADD TO BUILDING GMP	\$3,222,770

GMP (Guaranteed Maximum Price)

May 3, 2007

Clarifications & Assumptions School X

General Comments

Skanska USA Building Inc. was provided Drawings titled *"For Board Review - Not For Construction" most of which are dated 4/15/07. This GMP estimate has been revised to include the work identified in these civil drawings* In addition, four Addenda were issued by the design team which further clarify the design intent and answer numerous questions as submitted by Skanska, to the design team, through the preconstruction RFI process as follows:

- Addenda 1 January 18, 2007
- Addenda 2 February 9, 2007
- Addenda 3 February 16, 2007
- Addenda 4 February 21, 2007

Several "Value Engineering" and "Alternate" items are included, but may not be reflected in the drawings and specifications used to create this GMP. VE and Alternate logs, listing accepted items, are included with this GMP.

Basis of Estimate

Site Description and Understanding

This proposed Elementary School is to be located in Clay County, Florida and consists of the following Site components:

- 1) **All Site Work Including Parking Lots, Bus Loops, Main Road, Ball Fields and Retention Ponds**

GMP (Guaranteed Maximum Price)

May 3, 2007

Construction Requirements

Construction General Requirements are included in the total GMP value as a Lump Sum and are defined as costs directly related to the execution of construction, but are not necessarily represented in the final construction material of the project. Some of the General Requirements represented within this estimate are as follows:

1. Temporary facilities due to utilities not being available at site until 4/1/08

Construction General Conditions are included in the previous Building total GMP value as a Lump Sum and are defined as costs directly related to the execution of construction, but are not necessarily represented in the final construction material of the project. Some of the General Conditions represented within this estimate are as follows:

1. Personnel
2. Automobiles
3. Temporary (trailer)
4. Temporary office supplies
5. Temporary equipment (computers, fax, copier etc)
6. Temporary phones
7. Temporary utilities

Insurance & Bonds

Exclusive of the lump sum percentages included in the GMP Estimate for General Conditions and Construction Management Fee, we have included lump sum proposal values that will provide for correct amounts to the entire Project GMP for the following items:

1. Builder's Risk Insurance*
2. General Liability Insurance
3. Subguard Insurance
4. Performance and Payment Bond
5. A Credit of \$20,000 has been included to remove the requirement for the Owners and Contractors Protective liability policy.

GMP (Guaranteed Maximum Price)

May 3, 2007

*Builder's Risk Insurance coverage is for "basic perils" coverage with deductibles for each peril category. The costs of these deductibles have not been included in this estimate. We have assumed the project site is not in a flood zone and we have not included costs for flood insurance, as none would be required. The present insurance market in Florida is volatile largely due to the recent hurricane damage across the state. As such, it will be difficult to obtain any sort of "buy-down" of the deductibles. Regardless, these costs are not included in this estimate.

Additionally, we cannot guarantee the pricing of the builder's risk policy until such time that the policy is bound. Therefore, this price can only be considered on allowance. However, if the GMP proposal is accepted within the stated time of the proposed schedule, Skanska will accept the risk of buying out the policy within the lump sum value stated for the Builders Risk Insurance.

The Performance and Payment Bond will be provided on the form attached at the end of this section.

Exclusions

The following items were assumed to be either not anticipated within the basic scope of this project, or provided by others and were **not included** in this estimate:

1. Work beyond that stated in the drawings, specifications and addenda upon which the GMP Deliverable is based.
2. Full staff in place after Substantial Completion and no staff after final completion.
3. Obligations to indemnify hold harmless and defend the architect.
4. Consequential damages imposed on the Construction Manager.
5. Requirement to finance the performance of work, including work in dispute. Accordingly, should the Owner be withholding payment on the basis of the contention that a dispute exists; Owner shall make payment for the cost of such disputed work, provided that payments for such disputed work do not

GMP (Guaranteed Maximum Price)

May 3, 2007

- exceed fifty (50%) percent of the retainage then withheld from the Construction Manager.
6. This GMP Deliverable only includes work that is specifically identified in the contract documents, or which is reasonably and readily inferable from such information as being required to complete the work specifically required by the Construction Manager, all subject to these Qualifications and Assumptions and other terms of these GMP Deliverable.
 7. Assumption of responsibility for deficiencies in the design, including those resulting from a failure to discover deficiencies in the documents, except for those actually discovered during the constructability review previously conducted.
 8. Program overtime, to accelerate the construction schedule for completion earlier than indicated in the schedule, or non-standard working hours.
 9. Off-site work of any kind.
 10. Any costs associated with previous cost studies or design.
 11. Any costs associated with unsuitable in situ materials, unforeseen or hidden conditions or environmental remediation work including, but not limited to: environmental engineering, permitting, hazardous or contaminated soils, hazardous waste, or asbestos removal, on-site treatment, wetlands, soil importation / exportation, environmental permit fees, permit compliance and administration work related to site preparation and remediation work, dynamic compaction, hazardous substance removal, radon mitigation, special liners, leachate collection systems, ground water treatment, disposal, transport or tipping fees of any kind.
 12. Any office equipment such as copiers, printers, computers and servers, etc. as well as any office furniture.
 13. Spare parts for any kind of equipment, beyond those noted in the Technical Construction Specifications.
 14. Costs required by utility company to connect service or construction work on or off site.

GMP (Guaranteed Maximum Price)

May 3, 2007

15. Work required to extend utilities beyond connection to HWY 218
16. Moving/relocation and start-up of any furniture and equipment from other sites.
17. Public Agency reviews or approvals and associated fees. Building Permits are not included.
18. Professional service fees associated with the project, such as accounting, financial analysis or legal fees. Developer's fees, if any, are not included. Consulting A/E Costs to prepare site plan submission are not included.
19. Land purchase costs.
20. Taxes of any kind, including property taxes or business operations taxes. Payroll taxes associated with labor required to construct the project are included. Sales tax on material is included in the project cost, pending documentation of exemptions from the client.
21. Title Insurance.
22. Contingencies beyond those specifically noted in our estimate.
23. Posting of bonds required by Township, including escrow of inspection fees.
24. Artwork
25. Non fixed facilities equipment such as furniture
26. Computer Equipment

Escalation

This GMP Estimate includes costs for escalation for the next 30 days only.

Clarifications & Assumptions

GMP (Guaranteed Maximum Price)

May 3, 2007

The following definition represents the basis of our estimate, and serves as the GMP Deliverable/Estimate for the project. The costs were developed based upon the project description and schedule data described elsewhere in this report, and the assumptions, clarifications and design criteria presented under this section.

General

- 1) This GMP does reflect the Value Management and Alternate items previously detailed in the Building GMP and on VE and Alternate Sheets.
- 2) The cost estimate description for an item will take precedence over conflicting information in the plans, specifications or other contract documents.
- 3) The cost estimate contains notes that clarify the scope of the estimate. These notes [items such as 'deleted', 'incl. Above', 'w/Concrete', 'not used', etc.] shall govern over any conflicting information in other contract documents.
- 4) Our proposal assumes the facility will be constructed to the current Florida Code. Modifications to the code which may occur in the future are excluded.
- 5) The GMP Deliverable is based on the expectation that reasonable substitutions may be made to specified materials with Owner's approval.
- 6) The GMP Deliverable is based on the expectation that all pre-purchased items to be provided by the Owner will be provided without delay or disruption.
- 7) Warranties will be limited to one year from Construction Manager, with longer warranties from the respective trade contractor or manufacturer and no responsibility or liability of the Construction Manager after that one-year period.
- 8) The GMP Deliverable assumes any Separate contractors by the Owner will not interfere with the operation of the Construction Manger.
- 9) Where contract documents require that design information be provided by the Construction Manager, Design information (including calculations and certifications) these will be provided by trade contractors. The Construction Manager will rely on the trade contractor's in so doing. The GMP Deliverable does not include any costs and expenses to conduct an independent review of

GMP (Guaranteed Maximum Price)

May 3, 2007

such design information, and does not include costs and expenses resulting from any deficiencies or inaccuracies in these calculations or certifications.

- 10) This GMP Deliverable assumes that the owner and architect will issue approvals and conduct their respective responsibilities and tasks promptly so as to avoid any delays or interference with the progress of the work and will act reasonably and properly in doing so.
- 11) Our proposal does not include any costs associated with reviews by insurance underwriters such as IRI or FM.
- 12) Our proposal assumes that all utility installation will conform to the schedule attached to this proposal. Delays or overtime associated with modifications required by the utility installation, which has been contracted separately with Clay County Public Schools are excluded.
- 13) Due to the present level of definition in the documents, we suggest, or have included, the following contingencies:
 - Owner Scope Growth or Project Contingency: We have not included scope growth contingency to cover enlarging the size of the project, level of service of the components, modifications or acceleration of project schedule or additional quality to project components outlined in the estimate.
 - Construction Contingency: A construction contingency as noted in the estimate is included based on the cost of building/sitework and other cost categories. This construction contingency allowance is separate from any design/estimating contingency. This contingency shall be readily available to the Construction Manager through the "Contingency Charge Notification Process." This process shall include notification of the issue, issuance of a detailed price, and review and acceptance of the contingency charge by the Owner's Representative. Skanska shall maintain the contingency log and any charges against it for the Owners review at all times. This Contingency shall cover items not otherwise reimbursable as Cost of Work, coordination conflicts, deficiencies in Skanska's purchasing of the project scope, construction conditions which may occur after construction has begun, selective overtime/acceleration required by Skanska to accommodate the

GMP (Guaranteed Maximum Price)

May 3, 2007

construction schedule included in the estimate or agreed to by Skanska. However, in no event may the Construction Contingency be used to provide reimbursement for costs and expenses that result from the negligence of the Construction Manager. These charges shall be subject to two separate limitations, the first being that the total of all such expenses shall not exceed the amount of the Construction Contingency stated in the GMP deliverable, and, secondly, such costs and expenses shall be deemed cost of work. The Construction Contingency is for the use of the Construction Manager, at the Construction Manager's discretion and upon approval by the Owner. It shall not be for the Owner's use to cover design or scope changes. At the time of final acceptance of the project any remaining construction contingency shall be returned to the Owner.

- Design Contingency: We have not included a design/estimating contingency. We recommend that this contingency, if included, is kept separate from the construction contingency and that a program be adopted to maintain budgeted costs through the remaining stages of the project or through a budget management process, i.e. PCI. The intent of this contingency is to provide for the variation in the cost of labor, material and subcontracts as estimated by Skanska and to accommodate the evolution of the design details within the scope of work to which the contract or project estimate has been based.

It should be noted that the Design/Estimating and Construction Contingencies are not intended to fund additional scope not listed in this proposal requested by Clay County Public Schools.

Trade-Specific Clarifications & Assumptions

Divisions 1 through 17

1. This estimate does not include any modifications to the scope as a result of the differences between School Z documents and School X documents other than those included in the sitework scope of work.

DIVISION 2:

GMP (Guaranteed Maximum Price)

May 3, 2007

1. All sitework, fencing, sodding and erosion control is included.
2. No landscaping, plantings, irrigation, mulch are shown; therefore none are included.
3. De-mucking or over-excavation of same is not included as none was identified.
4. No gas piping or excavation and backfill for same is anticipated or included.
5. Water meters and fees for same are excluded. All water tap fees and related connect charges are excluded.
6. Mitigation of wetlands within and directly adjacent to the construction limits is included. Any mitigation of wetlands on the exterior of the construction limits is not included.
7. All sewage and utility tap fees are excluded.
8. All environmental and impact fees are excluded.
9. All traffic signals and loops are excluded.
10. Any existing site debris shall be removed by others.
11. CM assumes Owner will be identifying any trees to be protected within the construction limits prior to mobilization. Any trees and shrubbery remaining within the construction limits will be cleared as required.
12. Removal and / or allowances for removal of any unidentified subsurface conditions or debris are excluded. All other unforeseen conditions are also excluded.

DIVISION 3 through 16:

1. All Clarifications and assumptions for scope of work in Divisions 3 through 16 remain unchanged and as previously identified in the originally approved GMP estimate for School X.

DIVISION 16:

1. Due to continued inflationary pressure on electrical materials, this proposal is only valid for 30 days. A material escalation proposal can be provided as an alternate should the owner desire.
2. The local utility is to furnish and install all primary power wire, manholes, transformers, encasement concrete, and transformer pads. They shall also relocate any street lights (that they own) that are called out as being relocated. All charges are to be paid by the Owner.

GMP (Guaranteed Maximum Price)

May 3, 2007

3. This GMP includes all electrical equipment and connections for sixteen (16) portables which are to be provided by the owner, plus empty electrical conduits as shown on the drawings for sixteen (16) future portables. It is assumed that only 20 conduits are to extend to the property line for the future portables. It should be noted that currently the portables electric service entrance does not have spare capacity, as designed for the future portables, and no spare conduits for future service upgrades have been specified thus none are included.
4. Incoming Telephone and CATV service cables and final connections within the building are assumed to be provided by the local utility companies and are therefore excluded.
5. Electrical cost for the variance between Site Z electrical and Site X electrical have been included as an allowance to provide an estimated cost for the added scope to be included. RFIs are being issued to develop actual costs for this work and actual costs will be provided at a later date.
