Medicaid Reimbursement is a critical support for the School District of Clay County and Exceptional Student Education. The funds generated provided much of the needed supports and services for students with disabilities; supports required under the Individuals with Disabilities Education Act. Without Medicaid reimbursement dollars, these expenses would be necessity come from the general fund.

Annually, regulation changes and new compliance initiatives are unveiled at the National Alliance of Medicaid in Education (NAME) Conference. Under the Certified School Match Program (direct billing) Clay County has seen a tripling of funds into the district. To date, the personnel who work with billing procedures have maintained a zero-discrepancy audit history. In order to continue this unblemished record, thus avoiding audit deficits which would result in paying back collected funds, it is important to comply with Federal Guidelines and Regulations.

The National Alliance of Medicaid in Education National Conference is September 22-24 in Virginia. Sending the two people who work most closely with the billing and reimbursement process to this meeting would yield a large benefit for remarkably little cost. This investment of slightly over \$2400 would be paid by ESE Medicaid dollars.

This is an important investment to ensure that our Medicaid billing practices remain in compliance, while continuing the vital support of our ESE students.

I believe this is an important investment to ensure that our Medicaid billing practices remain in compliance with all regulations. We will pay the costs through Medicaid and will have it on the September Board, with your approval.

Terry
